

PRESS RELEASE

YOUR WINDOW TO A BETTER WORLD profine Group at Fensterbau Frontale 2020

When the gates to the world's leading window construction trade fair Fensterbau Frontale open in Nuremberg from March 18 to 21, 2020, profine Group in Hall 7 will again be the largest exhibitor. Thousands of visitors from all over the world are expected at the profine stand, which is presented under the motto YOUR WINDOW TO A BETTER WORLD.

profine strengthens corporate social responsibility (CSR)

Dr. Peter Mrosik, owner and CEO of the profine Group: "The motto sums up our CSR activities and our brand essence. In a world facing major challenges, we take responsibility together with our partners and contribute to solutions. We are pioneers in various sustainability issues, are involved in numerous social projects internationally, help people, and our windows make a significant contribution to achieving climate protection goals and reducing CO₂."

YOUR WINDOW TO A BETTER WORLD is also an expression of the profine Group for numerous innovations that will be presented at Fensterbau Frontale 2020.

proStratoTec: Colored, highly stable passive house windows without steel insert

As a highlight, profine presents proStratoTec. For the first time, the system provider is introducing the high-tech material Ultradur® from BASF into its premium systems with an installation depth of 88 millimeters using a tri-extrusion process.

Thanks to the innovative manufacturing process, the material is firmly integrated into the profile structure, making it possible to completely do without steel - even with colored profiles. This can be achieved without any size restrictions compared to white elements. For the first time, the system offers the possibility of realizing "Passive House according to Dr. Feist Standard" in color.

The recycling and the complete reuse are carried out by profine.

In addition to proStratoTec, profine Group is also presenting enhancements to its 88 millimeter system for high thermal insulation.

KÖMMERLING Unity: The first real hybrid system made of PVC-U and aluminum

There are many systems with aluminum shells for PVC-U profiles. But KÖMMERLING Unity is different. It is the first solution in which the materials PVC-U and aluminum have been designed together and synergistically as a hybrid system. KÖMMERLING Unity is the result of the

Starke Marken:

two system houses profine and Stemeseder which bring in their special core competencies.

With KÖMMERLING Unity, a direct non-positive connection of the two materials is created for the first time. Nevertheless, the new system allows moves of the two frame materials. This highly economical system can be designed modularly, and is based on the system 76 centre seal for the tilt and turn variants and the PremiDoor 76 for the lift/sliding doors.

Another special feature: "KÖMMERLING Unity" already fulfills future requirements for standards for „the sealing of components in contact with the ground“.

All solutions, all innovations for the future

Of course, profine also presents its wide system platform of the tilt and turn systems from 70 to 88 millimeters construction depth, including new solutions for residential doors and numerous international system variants for individual markets.

Sliding systems are in line with the trend. Here too, visitors can experience the large platform family of profine systems up close. The focus is on the new PremiLine 58, the very successful PremiDoor 76, the universal PremiSlide 76 and the innovative PremiFold 76 turn/sliding system.

On the subject of accessibility, profine will present the innovative zero-threshold system PremiPlan Plus including new variants.

Customers and trade visitors will also receive answers, ideas and solutions from profine on the subject of "digitalization". The best example of this is the ProDoor premium residential door, which can be digitally configured in its own web shop.

The wide range of shutter system solutions as well as the diverse range of PVC-U sheets for various areas of application round off the profine trade show program.

Experience profine and its strong brands

At Fensterbau Frontale 2020, profine Group will again provide surprises with its stand concept and events. What awaits customers remains a well-kept secret until the first day of the show. In any case, customer focus is key. Dr. Peter Mrosik gives daily insights and outlooks on the strategy of profine with his keynote, on technological research and developments as well as on future markets and opportunities for the industry.

Dr. Peter Mrosik: "Our trade show team and I personally - we are very much looking forward to meeting our customers and interested parties. We have numerous new topics that we would like to discuss intensively.

Starke Marken:

These include, for example, the consistent further development of our future-oriented product platform, also for very special areas of application, our branding and its advantages for our partners as well as our services and market support. I am sure that we can offer a lot of exciting and promising opportunities. YOUR WINDOW TO A BETTER WORLD - we fill this claim with life. We invite all manufacturers and partners to participate in our sustainable topics. Because I believe, that together we can achieve a lot for a future worth living."

proStratoTec: For the first time at profine, the innovative system with the high-tech material Ultradur® from BASF offers the possibility of realizing "Passive House according to Dr. Feist Standard" in color (schematic rendering).
